Lampung, Indonesia

I am a developer specializing in web development and DevOps. I have over 3 years of work experience and have developed various systems for personal use and clients. I am able to work in multiple programming languages, frameworks, and libraries for building systems. Passionate about cybersecurity, I'm constantly expanding my expertise to stay ahead in the evolving tech landscape.

EDUCATION

Sumatra Institute of Technology, *Informatics Engineering*
GPA 3.19/4.0

Present

PROJECTS

My Exams CBT, *Full-stack Web Development*

Oct 2025 - Sep 2026

- Maintained and improved the existing legacy codebase of the CBT system.
- Optimized the Teacher Inspection Progress page by retrieving data from Redis first instead of directly querying MongoDB, reducing MongoDB connection pool exhaustion.
- Redesigned the landing page with a Neo-Brutalism style and implemented an article management feature.
- access : myexams.web.id

License Dashboard, *Full-stack Web Development*

Mar 2025 - April 2025

- Designed system architecture and business logic.
- Implement user oriented web design using *NuxtUI Library*.
- Integrate API validation for licensing systems using fingerprintJS.

Bens Production, *Full-stack Web Development*

Nov 2024 - Jan 2025

- Designed the database relational diagram for Back-end.
- Implement user oriented web design using *HeroUI Library*.
- Integrate Back-end with Front-end using InertiaTS.
- access : benspro.id

Lampung Begawi, *DevOps Engineer*

June 2024 - Nov 2024

- Working on deploying web in staging, and production environments.
- Fixing bugs and helping with SEO optimization.
- access : lampungbegawi.com

BigOne, BigLake, BigQuery, BigBox Website, *Back-end Web Development*

June 2023 - Dec 2023

- Develop and maintain legacy RESTful APIs using the Django framework and manage CI/CD pipelines using GitLab.
- I joined the Landing Page team to fix and improve component responsiveness using Next.js.
- Collaborating with a team using *jira confluence* in the development process.

EXPERIENCE

PT Bebii Teknologi Indonesia, *Full-stack Developer & Project Manager*

Aug 2024 - Present

- Managed projects involving systems integrated with Meta Ads APIs and Google AdSense APIs, overseeing development, integration, and delivery.
- Engineered and maintained back-end systems for WordPress plugins, including automated updates, encrypted endpoints, and license management.
- Managed server environments using Docker, Nginx, and PM2 for deploying systems on server.

Samudera Digital (Ocean Script), DevOps Eng & Project Manager Apr 2024 - Dec 2024

- Oversaw project planning, execution, and delivery, ensuring timelines and quality standards.
- Managed and debugging cloud infrastructure to ensure system reliability.

Freelance, Full-stack Web Developer Mar 2024 - Present

- Worked independently as a freelancer for college projects and a friend's company.
- Proficient in developing systems using *Laravel*, *InertiaTS*, *ReactTS*, and deploying them on servers.

Diskominfo of Lampung Province, Full-stack Web Developer Intern Feb 2024 - Apr 2024

- As an intern, I was responsible for developing a helpdesk system.
- Took on two roles: *system architect* and *back-end developer* using the *Laravel framework*.

BigBox by Telkom Indonesia, Full-stack Web Developer Intern Jun 2023 - Dec 2023

- As an intern, I participated in project development, delivering solutions as *SaaS*.
- Responsible for managing three ongoing projects, including redesign efforts using *Storybook*.
- Focused on *Front-end Development* by slicing designs and integrating them using *NextTS*.
- Specialized in *Back-end Development*, creating RESTful APIs using *Django Rest Framework*.

Student President Election 2023, Head of IT Division Nov 2022 - Feb 2023

- Monitored and led a *Full-stack Development Team* using the *CodeIgniter framework* and *Tailwind CSS*.
- Conceptualized and provided guidance to two sub-divisions under my division: the *Web Development* and *Database Administrator* Sub-Divisions.

Campus Study and Orientation Program 2022, Head of Front-End Web Dev Jun 2022 - Aug 2022

- Initiated and established a dedicated GitHub organization for the campus event committee, serving as a centralized platform for collaboration, code management, and version control from 2022 to 2026.
- Led the Front-end Development Team, providing direction and setting targets.
- Monitored, reviewed, and managed pull requests in the repository.
- Evaluated team progress weekly to ensure timely completion of tasks.

ACHIEVEMENTS

- TOP 200 *Indonesia Digital Tribe* by BUMN Indonesia
- 36th Place on Capture The Flag by BPJS HealthKathon Indonesia
